

PRODUCT KNOWLEDGE

Leather

KARL DONOGHUE

We use the highest quality lamb leather in our collections. This beautifully soft material is a natural by-product of the meat and dairy industry.

Characteristics

Leather is a natural material with natural imperfections and variations in texture and shade. These should be expected and seen as intrinsic qualities of this beautiful material and not as faults.

Feel

We often present our leather designs, unlined creating a super lightweight feel. As the weather cools try layering a shearling piece under or over your leather for added warm and style.

For styling ideas why not follow us on Instagram: [@karldonoghue](https://www.instagram.com/karldonoghue) and on Youtube: [Karl Donoghue](https://www.youtube.com/KarlDonoghue).

Caring for your Karl Donoghue piece

- Our collections are designed and crafted in London using the highest quality materials and trims to create a luxurious product that should last a lifetime if cared for well. We call this "Luxury for Life".
- Avoid wearing your leather in heavy rain, this may affect the texture of the leather. If caught in the rain, shake off excess water and allow drying to occur naturally (on a broad-shouldered coat hanger) out of direct sunlight.
- Suede pile can be revived by gently rubbing with a soft suede brush or dry sponge.
- Leather products can be protected using a leather/suede spray. Test a small area first following any instructions on the can. We cannot accept responsibility for any results to the article.
- If your leather piece requires cleaning, always use a specialist cleaner following the instructions on the care label. It is advisable to remove any horn buttons/poppers/buckles before cleaning.
- Sunlight can cause leather to fade or change colour therefore it is advisable when storing your piece to keep it in the original dust bag. Never store your piece when damp or wet. Store in a low humidity location, never in a closed plastic bag.

Following these guidelines and the information on the product care label will help you to maintain the natural beauty of your Karl Donoghue piece for many years to come, a far more sustainable approach to fashion.
